Andishe, Tehran

SUMMARY

Full-stack developer experienced in building enterprise applications across both backend and frontend. Works with C# / ASP.NET Core, secure REST APIs, CQRS-based services, and PostgreSQL, alongside React / Next.js interfaces, shared UI patterns, and real-time features. Focused on delivering maintainable features that connect reliable services with practical user experiences.

WORK EXPERIENCE

Full-Stack Developer, Payamgostar Fava — Dejban Platform

2023 – Nov 2026

- Deliver full-stack features for the Dejban enterprise access-control platform using ASP.NET Core and React / Next.js, with containerized delivery supported by Docker and GitLab CI.
- Built the DCC (Document Control Center) service end to end for the Bank Mellat project, covering API design, file lifecycle workflows, metadata persistence, and storage integration.
- Implemented file upload, download, metadata retrieval, soft deletion, restoration, and permanent deletion using ASP.NET Core, CQRS, MediatR, and FluentValidation.
- Connected PostgreSQL / EF Core metadata storage with filesystem-based file storage, and implemented JWT-protected endpoints with file-access checks.
- Developed multi-app frontend features with React / Next.js, MUI, TanStack Query, and Turborepo; delivered real-time functionality with SignalR and role-based access.
- Designed versioned REST APIs behind a YARP gateway, standardized API errors with ProblemDetails, integrated Stimulsoft reporting into the frontend, and worked with RabbitMQ / MassTransit messaging infrastructure.

Personal Project — kadooseng.com

Ongoing

- Designed and developed a corporate web portal end to end, applying full-stack development skills across the application (kadooseng.com).

EDUCATION

B.Sc. Agricultural Engineering

2016 – 2021

- University of Tehran

KEY SKILLS

Backend

C#, ASP.NET Core, REST APIs, EF Core, PostgreSQL, CQRS, MediatR, FluentValidation, DDD, YARP, JWT / Identity

Frontend

JavaScript, TypeScript, React, Next.js, MUI, TanStack Query, React Hook Form, Zod, Zustand, Turborepo

Messaging & Realtime

MassTransit, RabbitMQ, Redis, SignalR

Delivery & Tooling

Docker, GitLab CI, Stimulsoft Reporting

AI-Assisted Development

OpenAI Codex, Cursor, ChatGPT — raised coding speed by ~80% and improved implementation accuracy through faster codebase exploration, assisted development, debugging, and refactoring
